## BBQ gloves

These BBQ gloves are heat resistant and protect your hands from the heat of your Kamado. The gloves are comfortable and should not be missed while grilling on your BBQ or Kamado.

# YAKINIKU BINCHOPAN

The binchopan is the most sustainable way of barbecuing. With the binchotan, you can light your Binchotan in a quick and authentic way. By placing the Binchotan upright in the pan, you create a concentrated heat, allowing your charcoal to glow quickly. The binchopan also serves as an extinguisher, so you can easily reuse your Binchotan and reduce CO2 emissions.

# BINCHOTAN PURIFIER

Easily purify your water with Binchotan charcoal, the black gold of Japan. This balances the pH level and reduces toxins in the water such as chlorine and bacteria. Binchotan can also be used to purify unpleasant odors in clothing or rooms, or as additional nutrition for plants.

## **ELDURAPI COCO BRIQUETTES CASCARA**

These briquettes from EldurApi are 100% natural and burn up to 3 times longer compared to basic charcoal.

Thanks to the addition of dried coffee berries, these briquettes give an exotic flavor to your ingredients.

## **ELDURAPI COCONUT BRIQUETTES HERBS**

These briquettes from EldurApi are 100% natural and burn up to 3 times longer compared to basic charcoal. Thanks to the addition of fire spices, these briquettes give a delicious subtle flavor and aroma to your ingredients.
